Bangalore

## PROFILE

A young, passionate and professional React JS developer with 3+ years of experience in building high performant websites with reusable components. Have worked in fast paced startup environment. Have deep understanding of Reactjs and Nextjs

## EXPERIENCE

### Melorra

Software Engineer  
Oct 2020 - Present

Here earlier the site was CSR so our team migrated the full code to SSR for better SEO and performance. I worked on increasing the site speed. Site link: <https://www.melorra.com/>

### Zwayam

Software Engineer  
March 2019 - Sept 2020

Being a software engineer here I have been working here in Reactjs developer in the front end, and nodejs developer in the backend.

## PROJECTS

---

### Melorra

Melorra is a e-commerce website where gold jewellery is sold online. The site is Server Side Rendered using Nextjs for better Search Engine Optimization. Optimized the code using intersection observer so that the site can load up fast. Used Context-api for managing the app wise state. Used localStorage to keep data intact so that when user comes after visiting other pages its cart data, wishlist data is safe.

**Technologies Used-** Reactjs, Nextjs, Bootstrap, Context-API, Hooks

**Link-** <https://www.melorra.com/>

### Amazon-Clone (Open Source)
